Backend: Laravel, REST APIs, Eloquent ORM, Authentication, OTP Login, Role-Based Access
Frontend: React.js, Vue.js, Alpine.js, Inertia.js, Livewire, HTML, CSS, Bootstrap, Tailwind CSS
Databases: MySQL, PostgreSQL, Database Design, Indexing, Query Optimisation, Migrations, Caching
Queues & Messaging: Laravel Queues, RabbitMQ, Redis, Laravel Horizon, Supervisor, Pusher, Server-Sent Events
Testing & Quality: PHPUnit, Pest, PHPStan, Laravel Pint, Code Reviews
Tools & Cloud: Docker, Docker Compose, AWS, Git, Bitbucket, GitHub Actions, Grafana
Integrations: Stripe, Didit KYC, Yousign, OpenRouter, Gemini API, OpenStreetMap, OSRM
AI & Automation: AI tools and LLM APIs (OpenRouter, Gemini API), AI-based image analysis, System Automation, Workflow Automation, AI Service Integration

Work Experience

Senior Laravel Developer

iSyncEvolution Pvt. Ltd. — Ahmedabad, Gujarat, India | Oct 2025 — Present

- Develop APIs and backend features for SaaS applications used by clients in different countries, using PHP, Laravel and MySQL.
- Help break applications into microservices and deploy them using Docker and AWS.
- Process background tasks with RabbitMQ and Laravel Queues.
- Integrate third-party services: Didit KYC, Yousign e-signatures and Stripe payments.
- Build location-based features for a ride-sharing application and features for a sports club platform in Italy.
- Improve database performance with indexes, slow-query fixes and caching.
- Write PHPUnit tests, build Grafana dashboards to monitor application health, review code and support sprint planning.

Junior PHP Laravel Developer

iSyncEvolution Pvt. Ltd. — Ahmedabad, Gujarat, India | Oct 2021 — Oct 2025

- Developed and maintained SaaS application features using PHP, Laravel and MySQL.
- Built REST APIs for web and mobile applications, including authentication, user roles and input validation.
- Created database tables and relationships and wrote queries for application features.
- Improved page loading times using MySQL indexes and Laravel eager loading.
- Fixed bugs, wrote PHPUnit tests and refactored existing code to improve stability.
- Worked with project managers, QA and design teams to deliver features and updates on time.

Projects

Sports Club Management Platform — Italy

Laravel, MySQL, REST APIs, Queues

- Developed backend APIs and features including schedules, attendance, calendars, notifications and role-based dashboards.
- Worked on subscription and billing features and background image-processing tasks.

Ride-Sharing and Location Platform — Australia

Laravel, Python, OpenStreetMap, OSRM

- Built location-based features, map data and location search, including indexing and clustering of 300,000+ coordinates.
- Used Python tools, OpenStreetMap data and OSRM to process facility entrance locations.

Restaurant SaaS Platform

Laravel, WebSockets, MySQL, REST APIs

- Built licence-key management for activating and validating the product across multiple platforms.
- Implemented offline sync with conflict handling so data stays consistent when devices reconnect.
- Used WebSockets for real-time updates between clients and the server.

TattooMe — Image Processing & Booking Pipeline

Laravel, Laravel Queues, Horizon, Supervisor, Redis, OpenRouter, Gemini API

- Built background jobs for ZIP file handling, WebP and AVIF image conversion, and AI-based image analysis using OpenRouter and Gemini Flash.
- Used Redis locks to prevent duplicate processing across multiple queue workers.
- Ran queue workers with Laravel Horizon and Supervisor, and added AI-based price estimation.
- Integrated Google Calendar with ICS files and timezone handling, and ACH payments.

Languages & Certification

Languages: Gujarati (Native), Hindi (Native), English (Professional)
Certification: Certified Agile Scrum Master — Simplilearn (2025)
